

Options & Accessories

Top logo is colour matched vinyl with colour matched background of your choice.

Easy to install and remove as required.

The Aero series has a large, integrated logo space at the top. This means that corporate logos or conference identification is clearly visible. It also means that the logo appears in any media coverage.

Permanent or temporary logos can be used.

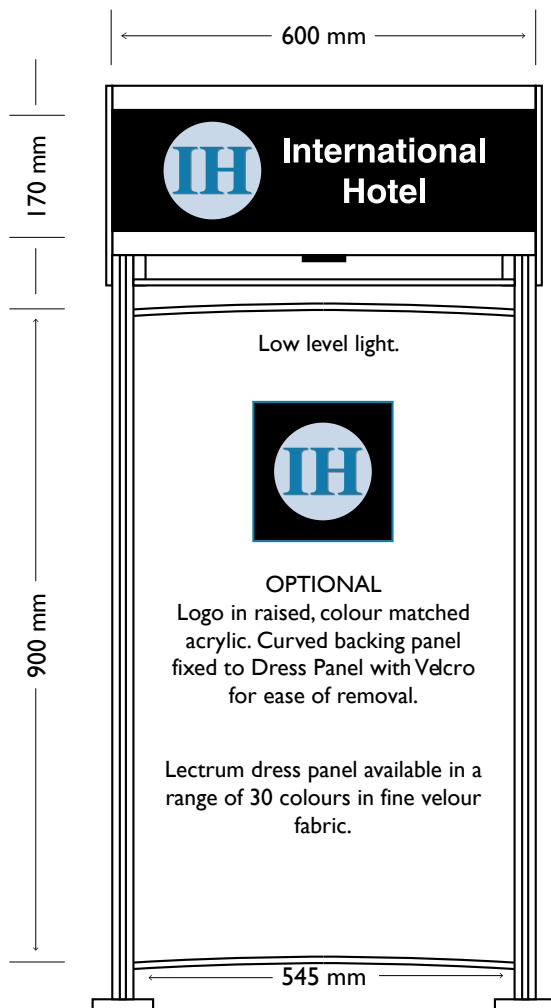

The use of a dress panel logo is enhanced by a low level light which provides a gentle wash over the panel.

Although a number of combinations of logos are possible, the Aero Series is ideally suited to having the full logo at the top.

We provide a comprehensive logo service. Please send artwork as an email attachment. Preferred formats are EPS, PDF or CDR. Vector file formats are best with text converted to curves or outlines. We also need to know the PMS (Pantone) numbers for each of your logo colours. We will then provide you with a layout for your approval before production starts.

Logos are produced from colour matched vinyl. Where a logo is not ordered with Aero a blank, black logo insert is supplied.

The dress panel logo is supplied on an acrylic backing panel which is attached to the Lectrum dress panel with Velcro.
